Daily Notes

33rd Day 333 Left Week 6

Legislation - Unsettled MW Dec 1st 2 weeks of January 41
Salem Cove with 2 of them

Tape Policy of ^{Security} ~~Tapes~~ maintained @ Troops

Secretary Ford - Any News release that would be controversial in nature -

Tomorrow - Security -

Sgt. Pettizini's Funeral -
HR - EWS

Inservice Training

Promotion Process

Academy Graduation

Discipline - Room on Board

Cadets -

Scarbelle
F-1 (163) OUT
very good
establishing
function

Range Issue - Capt Warren, Maja Eckrich - Me

Capt Warren contacted Facility Management Doyle T. Tiller Air Quality Control
Squad people used to be exposed to some Hazardous materials in that building
Also stated he was up there 2 weeks ago + it is not at a
hazardous stage it is at the imminent stage.

Tiller stated Cabinet Secretaries should work out an MOU + financial agreement.

Will be shooting shotgun the remainder of this week.

Bad test results will be ~~retest~~ returned by Thursday -
Environmental

At Ventura
\$1200 to come to facility + look at facility for air quality only -

Macham Company will address the bullet trap system

Report by Clarke/Nixon engineering group

Mark DiVore - Engineer with Facility Management -

EXHIBIT 35

February 2004

Monthly Focus:
Relationships—
Who are the people
that matter most to you?

Daily Notes

41st Day 325 Left Week 7

- Doyle Tiller - Mark DeVan
- Savage - recommended change -
- Admin feels Air handling system was working ^{sufficiently} at one time.
- Appl. subject op. Ford Home Cos - Met to discuss maintenance responsibility.
- Standards -
- State Police will be responsible for maintenance
- Test Results of Air Quality focused on lead + heavy metals
- Hazardous Material disposal - Cost Estimate -
- Chesapeake - reSalama air handling system.
- Chuck Nixon also conducted a test -
- Recommended = ceiling installation \$30-\$40,000 dollar
- Rather than install ceiling went to fragile summation.
- 1975 NIOSH standard - 75 cubic ft per minute.
- Range is considered a large quarry piling.
- Filter disposal.
- Offer revised
- Change twice Hazard clean - Lead 2X
- Fragile cleanup - Our responsibility - DSP Report -
- Zandini Has Mtr disposal - DSP

EXHIBIT 36

①

TEST DATE 02-11-04

02-25-04

Range

FTU SMIF
Capt. W.
Shirpie
me
(2 people)
NAI

- Neilson Assoc. Incorporated
- Environmental Solutions Group

(?) Reason why it won't stay in balance.

Ventilation system different ~~it~~ of
Later than it was in am.

(Ventilation)

On paper it was right, but mechanically
it's not right.

of 1st
things I
will do

(Put in drop ceiling).

Computer control system not right.

Copper & Lead over on South wall - (shutter pos. #2)

Bullet recovery - to fix - his guess.

112

[25,000 - 50,000 for Haz. waste clean-up.
75,000 for redesign & make trap right.

(2) 300,000 rounds handgun per yr.

"He would shut us down"

Since we've done the re balancing - you need to find the source of the problem.

look at design parameters & see what's happening.

if you change P.V. system - water, etc.
(debris) you could shoot shotgun.
etc.

Trap - monthly clean-up & disposal
of hazardous materials -

Nelson can ✓ the ventilation system to
see what's going on.

He will also come back to do tests
to make ~~new~~ tests that weren't done
due to LGS problems.

Will also test rest of building.

~~3~~
Recommendation

HAZ. material cleanup of Range
everything. Addtl costs to
what has been quoted (25.50).

- Need to do something w/ ventilation
before we do anything.

my
note

(Bottom line - Several hundred thousand \$
for all. at least.)

Rotate FFA people regularly - not
necessarily permanently but

2-25-04

Academy

1330 hrs.

Range ISSUES

CAREX's Ventilation - Action Target
Bill Provencher John Curtis

Project would take 3 mos. to construct.
This means once construction starts.

Yearly \$ 1000-1200 - monitoring & commissioning (ventilation)

20 k/per year ✓ & clean, etc. (TRAP)

Devoe - system seems to have trouble during
cold days & windy days.

we are not unique to have problems.

Blood levels ?

* positive pressure ventilation system
needs to be ~~used~~ used when cleaning.

Respiratory system
(?)

(Devoe) if we go w/ Provencher, things will
improve upon what we have now.

(2)

Devore - wants to talk to his
people before we proceed.

{ Randy Jackson. Navy
Provencher has numbers.
Devore will get 'em
